

# Multi-Station *“Flat Center” and “Sunken Display” Consoles*

By Sterling Modular

SSL Nucleus2 | Avid S3 | Slate Raven MTi & MTi2 | 30” Apple Cinema Display

The Multi-Station Flat Center Console is ideally suited for Tracking, Mixing, and Mastering. This flexible console retains our signature “Low Profile, Small Footprint, Open Design” which dramatically reduces acoustical reflections and improves heat dissipation. The results are better work product (STEMs) and extended life of electronic gear.

There is a complete line of accessories, and options to improve your workflow and ensure your comfort to get the most out of your console. Together, Synergy and Ergonomics are the overarching design philosophies that we use to design our components to properly match these and other consoles.

Avid Artist Series Rack Tray desktops are available with these Multi-Station consoles.

(Some options are shown.)  
(Mixers, Speakers, and
