Rupert Neve Designs 5088
"Pro Series" Console

By Sterling Modular

A complete line of furniture, accessories, and options to improve your workflow and ensure your comfort to get the most out of your Rupert Neve Designs 5088. The design of each component was carefully considered as a part of the whole. Synergy and Ergonomics are the over-arching design philosophy that we used to design our components to properly match this beautiful Console.

Each component, accessory, and option is designed and fabricated to match the 5088 and achieve a "from the RND factory" appearance.

Console Bucket Options

Pro Series Console Buckets are designed to provide you with a number of configurations for racking of electronics and / or for patch bays as well as various sizes of writing surfaces, producer desks, and DAWs. They are shipped replete with padded bolsters.

As always, our design team is available to provide advice, and if needed, to help you to create the custom solution that meets your specific application and workflow.

Shown here are only a few of the possibilities. Call us to see how we can build your dream console.

Shown below, are 2 examples of custom configurations. Bucket width can be changed to accommodate any gear requirements.

Patch Bay Options

The patch bay cabinets fit perfectly to the RND 5088 Console. The sides are ¼" aluminum and profiled to match the shape of the 5088 to give a seamless factory appearance.

They are pre-drilled to bolt directly to the RND 5088 frame. The hardwood trim is removed from the Console, then secured to the outside of our cabinet.

All other visible parts are black laminate or finished with a durable black texture coating.

The padded bolster is black leather and matches the RND 5088 bolster.
These cabinets provide additional rack space to mount converters, power supplies, and / or connector panels. A vented, removeable rear access panel is provided with each Patch bay.

All rack rails are mounted and included.
Rack blanks are not included and are available.
Shipping is not included.

Steel & Aluminum Stand

The Sterling Modular Steel & Aluminum Stand is designed to provide worry free stability for the 5088 Console and its Expansion Options. All upright components are steel. The rails are light-weight, extruded aluminum with webbing for additional strength. They are tapped for easy assembly. All steel components are coated with a durable black texture finish. Heavy duty 2 ½" levellers are included. The console platform is fabricated using ¾" thick melamine-coated MDF with finished edges. The Frame ships in two or more cartons and requires assembly.

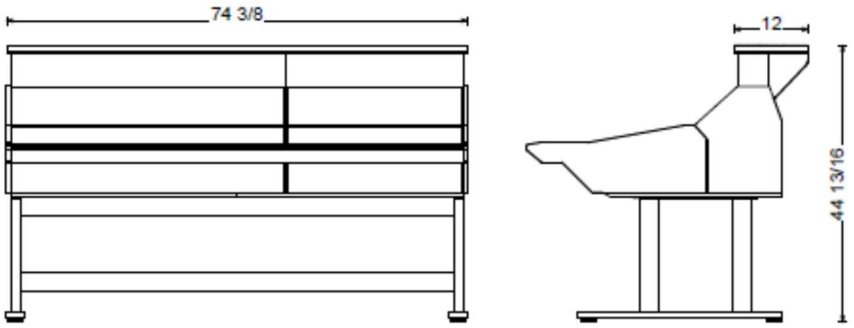
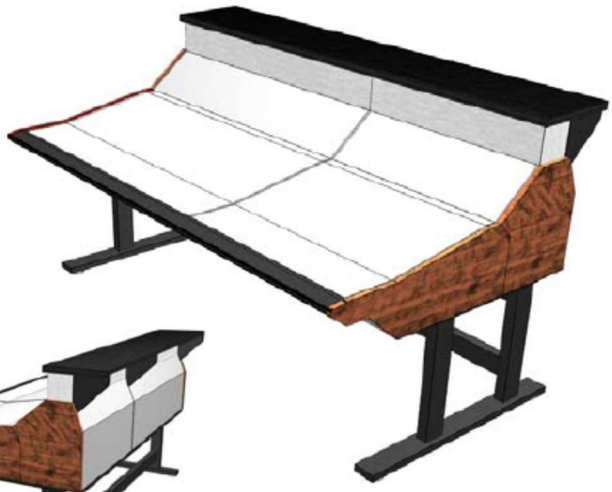
Speaker Bridge Options

The Speaker Bridge for the RND 5088 is specifically designed to sit on top of the meter bridge without the need for any screws. The Bridge is fabricated with ¾" MCP/MDF components to reduce acoustical resonance.



The top surface is covered with a 1/8" thick, pebbled-rubber mat to reduce resonance, minimize vibration, and lessen "walking" of gear during use. The edge surface is finished with rubber-like feel of PVC edge-banding. All other surfaces are coated with a durable texture finish. Some assembly is required.



Keyboard Tray Options

The keyboard tray is supported with two welded steel brackets. The tray surface is 8" x 31".
It is not retractable, but can be removed by sliding the assembly out of the slots provided in the support base.
